

VASILII SKOVORODIN

Senior Frontend Engineer with 5+ years of experience building production-grade SaaS platforms and data-heavy web apps using Vue/Nuxt and React with TypeScript. Strong focus on frontend architecture, performance optimization (90+ Lighthouse), and SSR/SEO. Experienced in FinTech/Web3 product flows (payments, wallets, security-minded UX), legacy refactoring, Vue 2→3 migrations, and shipping reliable, measurable improvements.

Selected Impact

- 90+ Lighthouse in production via SSR/SEO + performance optimization.
- Release cycle 20m → 3m by implementing CI/CD automation (GitHub Actions + Coolify).
- Bundle size reduced up to 40% during legacy refactor; engagement +22% on key flows.
- Safe migration Vue 2 + Vuex → Vue 3 + Pinia with zero downtime.
- Test coverage improved 15% → 70%; added Cypress regression testing to reduce post-release issues.

Core Skills

Frontend: TypeScript, JavaScript, Vue 2/3, Nuxt 3/4, React, HTML/CSS, TailwindCSS, SCSS
Architecture: component libraries, design systems, reusable UI patterns, refactoring, migrations
Performance/SEO: SSR, Lighthouse, bundle optimization, lazy loading
Testing/Quality: Jest, Cypress, Sentry, SonarQube
Tooling/DevOps: Vite, Webpack, pnpm, Docker, GitHub Actions, GitLab CI, Cloudflare, Nginx, Coolify
Integrations: REST, WebSockets, Stripe, Firebase, TonConnect

Work History

Lead Frontend Developer (Contract) *SwitchCase, Singapore (Remote) | May 2024 - Current*

- Built a platform from scratch using Nuxt 3 + TypeScript; implemented SSR/SEO and performance work to reach 90+ Lighthouse.
- Automated delivery pipeline (GitHub Actions + Coolify) reducing release time 20 minutes → 3 minutes.
- Created reusable UI patterns and an internal component library, reducing UI development time by ~30%.
- Collaborated cross-functionally (backend/QA/product) and contributed via 50+ code reviews.
- Implemented wallet connection (TonConnect) and security-minded onboarding

flows.

Frontend Team Lead (Contract, Part-time) *Gentlyx, Remote | October 2024 - January 2025*

- Refactored legacy frontend and achieved bundle size -40%; improved rendering and key flows, driving engagement +22%.
- Migrated parts of the app to React + Vite and introduced lazy loading for heavy modules.
- Improved delivery reliability through code reviews, refactoring guidelines, and regression coverage.
- Integrated Stripe payment flows and improved checkout UX + reliability.
- Note: overlapping dates due to parallel part-time contracts.

Frontend Developer (Contract) *2UIT, (Uzbekistan, Remote) | February 2022 - May 2024*

- Delivered data-heavy analytics dashboards (100K+ records) using virtual scrolling and lazy loading.
- Led migration Vue 2 + Vuex → Vue 3 + Pinia with zero downtime.
- Implemented real-time charts (Chart.js / D3) for 2K+ daily users
- Improved load performance by 60%.

Frontend Developer (Contract) *Transition Group, Remote | October 2020 - February 2022*

- Increased test coverage 15% → 70%; stabilized legacy Vue components through refactoring.
- Built responsive UI components and implemented i18n for 5 locales.

Frontend Web Developer *Buzz.ai, Remote | March 2019 - October 2020*

- Built and maintained marketing and chatbot UI surfaces (50K+/month traffic).
- Migrated from jQuery → Vue, reducing frontend bugs by ~70%; added Cypress regression testing.

Education

Bachelor's Degree in Microprocessor Electronics Kostroma Polytechnic College, Russia | July 2016
